

Weekly progress report			
Topic:	Chatbot – Final Project	Week No.	13
Course Code:	CSST101, CSST102	Term:	1st Semester
Course Title:	Advance Representation and Reasoning Basic Machine Learning	Academic Year:	2024-2025

Work Completed:

We finished fine tuning our chatbot by using learning rate and epoch then after that we conducted initial testing on the validation dataset

Challenges Encountered:

It's hard to select the appropriate fine tuning for our chatbot including what columns to use in training our chatbot

Solutions Implemented:

We use ChatGPT to recommend fine tuning methods we can use in our chatbot

Tasks for Next Week:

Improve our model and preprocessing techniques
