

Weekly progress report			
Topic:	Chatbot – Final Project	Week No.	12
Course Code:	CSST101, CSST102	Term:	1st Semester
Course Title:	Advance Representation and Reasoning Basic Machine Learning	Academic Year:	2024-2025

Work Completed:

We successfully found a dataset that we can use in our dataset in hugging face website and created an initial model architecture.

Challenges Encountered:

We had no idea in how to start our model architecture

Solutions Implemented:

We research articles, youtube videos, and ChatGPT about chatbots to learn how we can start the model

Tasks for Next Week:

Now that we have an initial model for our chatbot we can proceed in fine tuning our chatbot
